

CALL FOR ABSTRACTS

Abstract submissions will be open until 15 January 2017

Abstracts should be e-mailed to shuandai@me.com

Please include your name and most effective contact e-mail.

Two types of presentations are sought:

1. RESEARCH PAPERS

These will require a summary with the following format:

- Authors (with presenter highlighted)
- Title of the paper
- Purpose
- Methods
- Results
- Conclusions

You will be allocated 10 mins so please bear this in mind when planning your presentation.

2. CASE PRESENTATIONS

These can be PowerPoint presentations for the Friday morning session, or live cases for the Saturday morning, if you have patients willing to make the journey to Auckland. These cases generally form one of the most interesting and enjoyable parts of the meeting, with each presentation followed by a panel and audience discussion regarding the management options.

The live cases will be examined by the panel beforehand on the Saturday morning.

Please consider participating in this section if you have interesting or challenging cases to share.

For submission please provide your name, e-mail contact and a brief summary of the case.

PC and Mac computer will be available at the conference venue. All presenters must load their presentations including videos onto the provided computers at the venue, to facilitate timely running of the presentations.
