Minimally Invasive Glaucoma Surgery Masterclass

Complex Anterior Segment Surgery Masterclass

Minimally Invasive Glaucoma Surgery (MIGS)

MIGS MasterClass provides a structured, practical approach to contemporary minimally invasive glaucoma surgery, combining evidence-based lectures with surgical demonstrations and hands-on wetlab training. Participants will gain guidance on patient selection, surgical decision-making, and procedural techniques. Emphasis is placed on safe adoption, refinement of skills, and integration of MIGS into clinical practice.

Complex Anterior Segment Surgery (CASS)

CASS MasterClass provides a structured, step-by-step approach to the management of complex anterior segment conditions, integrating expert lectures with surgical demonstrations and hands-on wetlab training. Participants will learn strategies for iris repair, pupilloplasty, and capsular support, with guidance on fixation methods and instrumentation selection. Emphasis is placed on surgical ergonomics, instrument handling, and intraocular manoeuvres to enhance precision and confidence in complex cases.
